

## Project Disclaimer

This document serves as a formal disclaimer for the project conducted, which involves scanning vulnerabilities and exploiting a system. The following points outline the terms and conditions under which this project was performed:

1. **Ownership:**  
Both the systems involved in this project are owned by me. No external systems or networks were targeted or involved in any part of this project.
2. **Educational Purpose:**  
The primary purpose of this project was educational. It was undertaken to learn and understand the process of vulnerability scanning, system exploitation, and the associated security mechanisms.
3. **System Details:**  
The system exploited during this project is a **Metasploitable** system, which is an intentionally vulnerable system designed for security training and testing purposes.
4. **Ethical Considerations:**  
All activities performed in this project were conducted ethically, with a focus on understanding the principles of cybersecurity. No unauthorized access or malicious activity was conducted on any third-party systems.
5. **Legal Compliance:**  
This project was carried out in full compliance with applicable laws and regulations. At no point was any illegal activity undertaken, nor was any unauthorized system accessed.
6. **Confidentiality:**  
No sensitive or personal data was accessed, altered, or disclosed during this project. The activities were restricted to the test environment, ensuring that no real-world data or systems were compromised.
7. **No Real-World Impact:**  
The methods and techniques used in this project were confined to a controlled environment. There was no impact on real-world systems, networks, or individuals.
8. **No Guarantee of Security:**  
The findings and results of this project are specific to the controlled environment and should not be interpreted as a general guarantee of security or vulnerability for other systems.
9. **Assumption of Responsibility:**  
I, as the owner and operator of the systems involved, assume full responsibility for any outcomes or consequences of this project. There is no liability on the part of any third party.
10. **Research Documentation:**  
The documentation and results of this project are for personal use and educational purposes only. They will not be shared or distributed without proper authorization.
